ZDNet Asia under iFRAME hack attack?
F-Secure's Security Response Team Manager, Wing Fei Chia, has posted an entry at F-Secure's blog claiming that ZDNet Asia has a problem with their search engine and could be sending users to sites laden with malware and worse.

1 TalkBack +3

twitter

UPDATE: The Twitter admin hack appears to be the result of a successful social engineering attack against one of Twitter's employees — similar attack took place in January this year. Here's a retrospective of the events that took place.

Yesterday, a French hacker claimed to have gained access to Twitter's administration panel, and based on the screen shots that he included featuring internal data for accounts belonging to U.S President Barack Obama, Britney Spears, Ashton Kutcher, and Lily Allen, as well as a detailed overview of

Introducing
Paragent Appliances

The HOT Spot

Smartphones

Last year, many businesses deferred the purchase of new laptops in favor of smartphones, and why not? Offering phone, calendar, email, IM and Web access, they're arguably the most practical business tools. Check out the latest CNET Reviews of Blackberry devices for all the knowledge you need to make an intelligent choice.

Designed for bold living.

18.6.22 Shots from the Wild West - Sample Compilation of RATs (Remote Access

Tools) and Trojan Horses Screenshots - An OSINT Analysis (2022-06-27 17:14)

Dear blog readers,

Find attached a second portfolio of photos obtained while doing my research back in 2010.

Enjoy and don’t forget to grab a copy of my memoir [1]here including to catch up with my

latest research [2]here.

18.6.23 DDanchev is for Hire! - Who Wants to Hire Me in Europe? (2022-06-27 19:04)

[1]

23703

Folks,

After a decade of fighting bad guys I've decided to finally look for a way to relocate and be-

gin a fresh start in my professional security blogger/cybercrime researcher/OSINT analyst and

threat intelligence analyst career path by seeking a permanent position anywhere in Europe

from anyone who's interested in directly hiring me and offering relocation and accommodation

assistance on a short notice where I can basically relocate and begin the position without a

period of three days prior to signing a contract and receiving the necessary relocation and ac-

commodation assistance and let's not forget that someone should meet me at the airport and

say hi.

The current situation:

- I'm based in Bulgaria holding a Bulgarian citizenship

- I'm willing to relocate anywhere in Europe for a security blogger/ cybercrime researcher/OSINT

analyst and threat intelligence analyst position

- I work primary using email which is dancho.danchev@hush.com where you can reach me 24/7

and expect a brief response three hours prior to sending your message

- My CV is available as [2]PDF here and here's my [3]LinkedIn Profile just in case you need it

for anything

My requirements:

- I need only a direct hire proposition where you're 100 % sure that you're interested in working

with me

- I need a contract in advance before I travel on a short notice approximately three days prior

to signing the contract

- I need relocation assistance in the form of an airplane ticket including accommodation assis-

tance where I need a place to crash work and live in your country

How to approach me:

Send me an email at dancho.danchev@hush.com and I'll shortly get

back to you to discuss

Looking forward to receiving your email. Let's make this happen!

18.6.24 Exposing an Indian Police Spyware Cyber Operation that Fabricated Ev-

idence on the PCs of Indian Activists - An OSINT Enrichment Analysis

(2022-06-27 22:01)

[1]

23704

From: **Jennifer Gonzales** <jennifergonzales789@gmail.com>
Date: Sat, 26 Oct, 2019, 15:38
Subject: Reminder Summons For Rioting Case
To: <[redacted]>

[redacted] **CrPC 146 Indictment Summary**

Jennifer Gonzales
Special Public Prosecutor, Jagdalpur

This is what happens when you're cheap.

Guess which are the major IoCs (Indicators of

Compromise) in this cyber attack campaign featured on [2]Wired.com? Keep reading this

OSINT enrichment analysis and find out the actual true Indicators of

Compromise.

Sample Gmail accounts known to have been involved in the campaign include:

jagdish.meshraam@gmail.com

drsnehapatil64@gmail.com

sinhamuskaan04@gmail.com

jennifergonzales789@gmail.com

payalshastri79@gmail.com

Sample malicious domains known to have been involved in the campaign:

researchplanet.zapto.org

socialstatistics.zapto.org

duniaenewsportal.ddns.net

Sample domain registrant email address accounts known to have been involved in the cam-

paign include:

18.6.25 Is Koobface Botnet's Master KrotReal Back in Business? Try the Adult Enter-

tainment Industry First! (2022-06-28 15:42)

[1]

Remember the [2]Koobface botnet and the "[3]Koobface Botnet Master KrotReal Back in Busi-

ness, Distributes Ransomware And Promotes BHSEO Service/Product" post?

23708

I've decided to dig a little bit deeper using my own techniques and methodology and actually

attempt to find additional information on KrotReal's online whereabouts as of 2022 in terms of

malicious and fraudulent activities and I found evidence of several new domain registrations

using his original krotreal@gmail.com personal email which I originally profiled and exposed in

my original [4]OSINT analysis back in 2012.

18.6.26 Bogus "Shocking Video" Content at Scribd Exposes Malware Monetization

Scheme Through Parked Domains (2022-06-28 18:50)

Bogus

content

populating

Scribd,

centralized

malicious/typosquatted/parked

do-

mains/fraudulent infrastructure, combined with dozens of malware samples phoning back to

this very same infrastructure to monetize the fraudulently generated traffic, it doesn't get any

better than this, does it?

This case is a great example of one of the core practices when profiling cybercrime inci-

dents and campaigns -> sample everything, as what you're originally seeing is just the tip of

the iceberg.

18.6.27 Rogue iFrame Injected Web Sites Lead to the AndroidOS/FakeInst/Trojan-

SMS.J2ME.JiFake Mobile Malware (2022-06-28 18:51)

A currently ongoing malicious campaign relying on injected iFrames at legitimate Web sites,

successfully [1]**segments mobile traffic**, and exposes mobile users to fraudulent legitimately

looking variants of the AndroidOS/FakeInst/Trojan-SMS.J2ME.JiFake mobile malware.

Let’s dissect the campaign, expose the domains portfolio currently/ historically known to

have been involved in this campaign, as well as list all the malicious MD5s known to have

been pushed by it.

iFrame injected domains containing the mobile traffic segmentation script parked on

the same IP:

asphalt7-android.org - 93.170.109.193

fifa12-android.org

gta3-android.org

fruit-ninja-android.org

wildblood-android.org

osmos-android.org

18.7.2 Historical OSINT - Profiling a Compilation of Known Apophis Exploit Kit C&C

Public Domains - An OSINT Analysis (2022-07-01 20:55)

[1]

I’ve been recently digging into several archives in terms of looking for actionable threat intel-

ligence based on my research circa 2010 with the idea to enrich it in 2022 and collerate it

with several of my proprietary databases for threat intelligence and OSINT related materials

in terms of fighting and responding to cybercrime hence the results

which is an active domain

portfolio of Apophis exploit and phishing kit which you can check out in terms of OSINT threat

intelligence enrichment.

Sample Apophis C &C domains circa 2010 based on my research include:

hxxp://mystabcounter.info

hxxp://555traff.biz

hxxp://555traff.org

hxxp://555traff.net

18.7.3 Time to Say Goodbye! (2022-07-06 21:56)

[1]

Ho, Ho, Ho.

Merry Christmas or Christmas just came in earlier.

This is an official letter to all of my 5.6M readers since December, 2005 including an official

letter to the U.S Security Industry including my current colleagues and friends from across the

globe including the dark corners of the Web although there's no such thing as a dark corner of

the web just like there's no such thing as free lunch including the fact that an OSINT conducted

today is a tax payer's dollar saved somewhere.

The big news is this is going to be [2]the last post.

I wanted to say big thanks to everyone who's been following my work even since I originally

launched my personal blog back in December, 2005 and to my one and only employer in the

23749

world Webroot Inc. for hiring me and bringing me on board which basically resulted in a decent

lifestyle for a period of several years including the renovation of my place.

[3]

What I'm left with after my retirement? A modest $150 social pension to take care of my mobile

and Internet bills including some food which is a great advice for everyone involved in the field

to know that it takes a bold man including a one-man show operation to take care of everything

and then try to retire.

[4]

23750

My advices for everyone in the industry include the following hots tips right and straight from

the source:

- never fell victim into the "certificate crowd" myopia and the "more the merrier" mentality be

yourself say everything and don't forget to do everything and never take credit for what you're

doing and what you've been doing and always say cheers or hi to someone who says hi and

cheers to your work and achievement

- don't forget the U.S is secretly hiring security bloggers to jump in the Information Warfare

front if there's any which is naturally something that there is but only in case you know what

you're up to in terms of getting yourself dazzled and embraced by any of the virtual domain di-

mensions that you choose for your Information and Cyber Warfare purposes and goal achieving

projects

[5]

23751

Best wishes to everyone who made it happen. And in a surreal universe remember that

"diamonds degrade their quality. Bulletproof hosting services courtesy of the RBN are for-

ever. Grab a copy of memoir from [6]here including from

[7]Cryptome.org and consider going

thought my research portfolio throughout the years here and stay tuned for the Second Edi-

tion of my Cyber Intelligence memoir which will be published in Bulgarian and made available

exclusively to Bulgarian readers who might be interested in catching up in terms of what I've

been up to during the years.

Don't forget if you ever need me for anything including a project that you want to work with me

on including advice or just to say "hi" and thanks for all the hard work or anything in general

feel free to drop me a line at dancho.danchev@hush.com which is my email address account

which I check 24/7 and I'll make sure to send back a proper response.

Yours sincerely not necessarily exclusively and don't forget that although [8]you know my name

you should not necessary do your best to look up my "number".

18.7.4 Dissecting the Koobface Worm's December Campaign (2022-07-08 18:37)

The [1]Koobface Facebook worm – [2]go through an [3]assessment of a previous campaign

– is once again making its rounds across social networking sites, [4]Facebook in particular.

Therefore, shall we spill a big cup of coffee over the malware campaigners efforts for yet

another time? But of course.

23753

Only OPSEC-ignorant malware campaigners would leave so much traceable points, in between

centralizing the campaign's redirection domains on a single IP. For

instance, taking advantage

of free web counter whose publicly obtainable statistics – the account has since been deleted

– allow us to not only measure the clickability of Koobface's campaign, but also, prove that

they're actively multitasking by combining blackhat SEO and active spreading across several

other social networking sites. Here are some of the key summary points for this campaign :

Key summary points :

- the hosting infrastructure for the bogus YouTube site and the actual binary is provided

by several thousand dynamically changing malware infected IPs

- all of the malware infected hosts are serving the bogus YouTube site through port 7777

- the very same bogus domains acting as central redirection points from the November's

campaign remain active, however, they've switched hosting locations

- if the visitor isn't coming from where she's supposed to be coming, in this case the

predefined list of referrers, a single line of "scan ref" is returned with no malicious content

displayed

- the campaign can be easily taken care of at least in the short term, but shutting down

the centralized redirection points

What follows are the surprises, namely, despite the fact that Koobface is pitched as a Facebook

worm, according to their statistics – [5]go through a previously misconfigured malware cam-

paign stats – the majority of unique visitors from the December's campaign appear to have

been coming from Friendster. As for the exact number of visitors hitting their web counter,

counting as of 7 November 2008, 12:58, with 91,109 unique visitors on on 07 Nov, Fri and

another 53,260 on 08 Nov, Sat before the counter was deleted, the cached version of their

web counter provides a relatively good sample.

On each of the bogus Geocities redirectors, the very same **lostart .info/js/gs.js** (58.241.255.37)

used in the previous campaign,

attempts to redirect to **find-allnot .com/go/fb.php**

(58.241.255.37) or to **playtable .info/go/fb.php** (58.241.255.37), with fb.php doing the

referrer checking and redirecting to the botnet hosts magic.

Several other well known

malware command and control locations are also parked at 58.241.255.37 :

jobusiness .org

a221008 .com

y171108 .com

searchfindand .com

ofsitesearch .com

fashionlineshow .com

anddance .info

23755

firstdance .biz

prixisa .com

danceanddisc .com

finditand .com

findsamthing .com

freemarksearch .com

find-allnot .com

find-here-and-now .com

findnameby .com

anddance .info

These domains, with several exeptions, are actively participating in the campaign, with

the easiest way to differentiate whether it's a Facebook or Bebo redirection, remaining the

descriptive filenames. For instance, fb.php corresponds to Facebook

redirections and be.php

corresponding to Bebo redirections (**ofsitesearch .com/go/be.php**). However, the meat resides

within the statistics from their campaign :

23756

It’s the Facebook message that came from one of your infected friends pointing you to an

on purposely created bogus Bloglines blog serving fake YouTube video window, that I have

in mind. [1]The Koobface gang has been mixing social engineering vectors by taking the

potential victim on a walk through legitimate services in order to have them infected without

using any client-side vulnerabilities.

For instance, this bogus Bloglines account (**bloglines .com/blog/ Youtubeforbiddenvideo**)

has attracted over 150 unique visitors already, part of Koobface’s Hi5 spreading campaign

(**catshof .com/go/hi5.php**). The domain is parked at the very same IP that the rest of the

central redirection ones in all of Koobface’s campaigns are - [2]58.241.255.37.

23773

Interestingly, since [3]underground multitasking is becoming a rather common practice, the

bogus blog has also been advertised within a blackhat SEO farm using the following blogs,

currently linking to several hundred bogus Google Groups accounts :

bloglines .com/blog/gillehuxeda

bloglines .com/blog/chaneyok

bloglines .com/blog/ramosimeco

bloglines .com/blog/antwanuvfa

bloglines .com/blog/tamaraaqo

bloglines .com/blog/josephyhti

Abusing legitimate services may indeed get more attention in the upcoming year, follow-

ing their interest in the practice from the last quarter.

18.7.8 Real-Time OSINT vs Historical OSINT in Russia/Georgia Cyberattacks

(2022-07-08 18:39)

23777

The original [1]real-time OSINT analysis of the Russian cyberattacks against Georgia conducted

on the 11th of August, not only closed the Russia vs Georgia cyberwar case for me personally,

but also, once again proved that real-time OSINT is invaluable compared to [2]historical OSINT

using a commercial social network visualization/data mining tool which cannot and will never

be able to access the Dark Web, accessible only through real-time

[3]CYBERINT practices.

23778

```
Официальный вебсайт президента Грузии ping -n 5000 -l 1000 www.president.gov.ge -t
Правительство Грузии ping -n 5000 -l 1000 www.government.gov.ge -t
Парламент Грузии ping -n 5000 -l 1000 www.parliament.ge -t
МИД Грузии ping -n 5000 -l 1000 www.mfa.gov.ge -t
МВД Грузии ping -n 5000 -l 1000 www.police.ge -t
МО Грузии ping -n 5000 -l 1000 www.mod.gov.ge -t
Министерство финансов Грузии ping -n 5000 -l 1000 www.mof.ge -t
Национальный Банк Грузии ping -n 5000 -l 1000 www.nbg.v.gego -t
```

The value of real-time OSINT in such [4]people's information warfare cyberattacks – with

[5]Chinese hacktivists perfectly aware of the [6]meaning of the phrase – relies on the rel-

atively lower operational security (OPSEC) the initiators of a particular campaign apply at

the beginning, so that it would scale faster and attract more participants. What the Russian

government was doing is fueling the (cyber) fire - literally, since all it takes for a collectivist

society's cyber militia to organize, is a "call for action" which was taking place at the majority

of forums, with the posters of these messages apparently using a spamming application to

achieve better efficiency.

[7]The results from 56 days of [8]Project Grey Goose in action got published last week,

a project [9]I discussed back in August, point out to the bottom of the food chain in the entire

campaign - **stopgeorgia.ru** :

" *Furthermore, coming up with [10]Social Network analysis of the cyberattacks would produce*

nothing more but a few fancy graphs of over enthusiastic Russian netizen's distributing the

static list of the targets. The real conversations, as always, are [11]happening in the "Dark

Web" limiting the possibilities for open source intelligence using a data mining software.

Things changed, OPSEC is slowly emerging as a concept among malicious parties, whenever

some of the "calls for action" in the DDoS attacks were posted at mainstream forums, they

were immediately removed so that they don't show up in such academic initiatives"

So what's the bottom line?

Nothing that I haven't already pointed out back in August :

"[12]Report: Russian Hacker Forums Fueled Georgia Cyber Attacks" :

23779

" *But experts say evidence suggests that Russian officials did little to discourage the on-*

line assault, which was coordinated through a Russian online forum that appeared to have

been prepped with target lists and details about Georgian Web site vulnerabilities well before

the two countries engaged in a brief but deadly ground, sea and air war."

[13]Some more comments :

" *Just because there was no smoking gun doesn't mean there's no connection," said Jeff*

Carr, the principal investigator of Project Grey Goose, a group of around 15 computer security,

technology and intelligence experts that investigated the August attacks against Georgia. "I

can't imagine that this came together sporadically," he said. "I don't think that a disorganized

group can coalesce in 24 hours with its own processes in place. That just doesn't make sense. "

It wouldn't make sense if this was the first time Russian hacktivists are maintaining the same

rhythm as real-life events - [14]which of course isn't.

23780

Moreover, exactly what would have constituted a "smoking gun" proving that the Rus-

sian government was involved in the campaign, remains unknown – I'm still sticking to my

comment regarding [15]the web site defacement creative. If they truly wanted to compromise

themselves, they would have cut Georgia off the Internet, at least from the perspective offered

by this graph courtesy of the [16]Packet Clearing House speaking for their dependability on

Russian ISPs.

As for [17]the script kiddies at **stopgeorgia.ru**, [18]they were informed enough to fea-

ture my research into their "negative public comments section". To sum up - the "DoS battle

stations operational in the name of the " *[19]Please, input your cause*" mentality is always

going to be there.

When you get the "privilege" of [1]getting DDoS-ed by a high profile DDoS for hire service

used primarily by cybercriminals attacking other cybercriminals, you’re officially doing hell of

a good job exposing [2]money laundering scams.

The attached screenshot demonstrates how even the relatively more sophisticated counter

surveillance approaches taken by a high profile DDoS for hire service can be, and were in

fact bypassed, ending up in a real-time peek at how they’ve dedicated 4 out of their 10

BlackEnergy botnets to Bobbear exclusively.

Perhaps for the first time ever, I come across a related DoS service offered by the very

same vendor - **insider sabotage on demand given they have their own people in a particular**

company/ISP in question. Makes you think twice before considering a minor network glitch

what could easily turn into a coordinated insider attack requested by a third-party. Moreover,

now that I've also established the connection between this DDoS for hire service and one of

the command and control locations (all active and online) of one of the botnets used in the

[3]Russia vs Georgia cyberattack, the [4]concept of engineering cyber warfare tensions once

again proves to be [5]a fully realistic one.

18.7.10 Call for Interest - Establishing the Foundations for a Part-Time Project-Based

Cybercrime Project Task Force (2022-07-08 18:41)

Dear blog readers,

I wanted to let everyone know that I'm currently busy a temporary part-time project-

based task force and I might need your input in terms of a possible Task Force participation in

the following categories:

• Social Network Analysis

23783

• Technical Collection

• OSINT Enrichment

• Sentiment Analysis

• Statistical Output Based Demographics Research

• OSINT Visualization

The project is vetted and invite-only therefore it would be great if you approach me with a

brief message at dancho.danchev@hush.com signifying your will and capability to participate

in the project with a brief introduction of your background and how you think you might be

capable of helping.

Looking forward to begin working with you.

Stay tuned!

18.7.11 Dancho Danchev's Blog - Soliciting Contributing Writers and Guest Bloggers

(2022-07-08 18:41)

Dear blog readers,

As many of you noticed I've recently expanded my blog to include and feature a diverse

set of personal research portfolio including additional coverage in a variety of areas and I

wanted to let everyone know that I'm currently busy working on an additional set of research

articles and new products that I'll publish anytime soon.

I wanted to let everyone know that I'm currently busy soliciting an Open Call for Con-

tributing Writers and Guest Bloggers on one of the industry's leading Security publications

- Dancho Danchev's Blog - Mind Streams of Information Security Knowledge on my way to

harness the best security and cybercrime researchers including threat

intelligence analysts

from across the Security Industry who might be interested in a diverse and high-profile set of

audience in terms of publishing their opinion thought and general and never-published before

security and cybercrime including threat intelligence research.

Who can participate?

- Basically everything who can write security articles and security

blog posts on various topics including malicious software botnets OSINT methodologies and

23784

general cybercrime research including Threat Intelligence analysis.

Looking forward to receiving your response - disruptive.individuals@gmail.com

Stay tuned and I look forward to continue working with you!

18.7.12 Upcoming Personal Memoir - Official Announcement! (2022-07-08 18:43)

[1]

Dear blog readers,

Big news. I've recently decided to convert my personal blog into a pre-order landing page for

my 756 pages long upcoming personal memoir in the world of hacking and security circa the

90's up to present day including an elaboration on my security blogging cybercrime research

and threat intelligence gathering including OSINT and independent contractor analysis exper-

tise and experience for the purpose of lauching my personal memoir and making it publicly

accessible in December, 2021 both in print and in multiple E-book formats for the general pub-

lic or basically anyone who drops me a line at dancho.danchev@hush.com in terms of possible

pre-order where the print version is priced at $35 and the E-book version is priced at $20.

What you can do in order to obtain access to my upcoming memoir? Drop me a line at dan-

cho.danchev@hush.com in terms of possible pre-order including to participate in my pre-order

newsletter where I will send you a direct message once the memoir is ready to be released

with the official release date scheduled for December, 2021.

Please stand by, while we are checking your browser...

Why do I have to complete a CAPTCHA?

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

Host
Error

What happened?

The origin web server is not reachable.

What can I do?

If you're a visitor of this website:

Please try again in a few minutes.

If you're the owner of this website:

Check your DNS Settings. A 523 error means that Cloudflare could not reach your host web server. The most common cause is that your DNS settings are incorrect. Please contact your hosting provider to confirm your origin IP and then make sure the correct IP is listed for your A record in your Cloudflare DNS Settings page. Additional troubleshooting information here.

Cloudflare Ray ID: 6a7584792dcb5233 • Your IP: 64.185.233.5 • Performance & security by Cloudflare

Tip: This domain name has expired and cannot be normally accessed. Please renew it to continue using it.
Please contact your domain name service provider to quickly renew the domain name. This will avoid the risk that the domain name will be deleted or registered by someone else.

1. If you are an Alibaba Cloud member, please log on to your Alibaba Cloud account and go to the Domain Name Console -> Domain Name List -> Urgent Domain Name Renewal, to complete domain name renewal.

2. If the domain registration service is provided by an Alibaba Cloud agent, please contact your agent to discuss renewal.

CentOS

Home | Wiki | Mailing Lists | Mirror List | IRC | Forums | Bugs | Donate

Welcome to CentOS

The Community ENTerprise Operating System

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by Red Hat, Inc. for Red Hat Enterprise Linux. CentOS conforms fully with the upstream vendors redistribution policy and aims to be functionally compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

CentOS is developed by a small but growing team of core developers. In turn the core developers are supported by an active user community including system administrators, network administrators, enterprise users, managers, core Linux contributors and Linux enthusiasts from around the world.

CentOS has numerous advantages including: an active and growing user community, quickly rebuilt, tested, and GPG'ed errata packages, an extensive mirror network, developers who are contactable and responsive, Special Interest Groups (SIGs) to add functionality to the core CentOS distribution, and multiple community support avenues including a wiki, IRC Chat, Email Lists, Forums, Bugs Database, and an FAQ.

没有找到站点

您所请求的Web服务器中没有找到对应的站点！

可能原因：

1. 您没有添加域名或者IP绑定到该站点；
2. 配置文件未生效；

如何解决：

1. 检查是否已经绑定到对应站点，如果认已绑定，请尝试重启Web服务；
2. 检查端口是否正确；
3. 如果使用了CDN产品，请尝试清除CDN缓存；
4. 普通网站访客，请联系网站管理员；

18.7.14 How I Got Robbed and Beaten and Illegally Arrested by a Local Troyan Gang

in Bulgaria? - Part Two (2022-07-25 04:20)

Dear blog readers,

Here’s the second part of my original "[1]How I Got Robbed and Beaten and Illegally Arrested by

a Local Troyan Gang in Bulgaria?" post where I'm aiming to provide more actionable intelligence

on the local people from my hometown in the city of Troyan Bulgaria responsible for my illegal

arrest with stolen ID home molestation and illegal beating and kidnapping attempt.

Feel free to approach them in case you're interested in my whereabouts.

I can be reached at +359 87 689 3890 or at dancho.danchev@hush.com 24/7 in case you're

interested in knowing more about my whereabouts.

Figure 2. Intelligence Discipline Integration

18.7.15 Basics of OSINT in the Context of Fighting Cybercrime - The Definite Begin-

ner's Guide (2022-07-26 20:04)

[1]

Dear blog readers,

I've recently came up with an interesting article which I've decided to share with my blog

readers where my idea is to inspire and motivate you to join the world of cybercrime fighting

in the context of using OSINT which is a powerful tool and a concept in the ever ongoing fight

against cybercrime internationally.

"*What use are they? They've got over 40,000 people over there reading newspapers.* " - Presi-

dent Nixon

This introductory guide into the world of OSINT is part of an upcoming series of articles aiming to

assist both novice and experienced security practitioners including analysts for the purpose of

entering the world of OSINT for cybercrime research and aims to offer a high-profile and never-

published before practical and relevant in today's nation-state and rogue cyber adversaries

Internet and cybercrime ecosystem whose purpose general overview and introductory material

and training course material for novice beginners including advanced Internet users hackers

security consultants analysts including researchers who are interested in exploring the world

of OSINT (Open Source Intelligence) for the purpose of making a

difference doing their work in

a better and more efficient way including to actually be fully capable and equipped to catch

the bad guys online including to monitor and track them down to the point of building the big

picture of their fraudulent and rogue online activities. The course including the actual learning

and training material is courtesy of Dancho Danchev who is considered one of the most popular

security bloggers threat intelligence analysts and cybercrime researchers internationally and

within the security industry.

The primary purpose behind this guide is to summarize Dancho Danchev's over a decade of

active passive and active including actionable threat intelligence and OSINT research type of

experience including cybercrime research type of experience where the ultimate goal would

be to empower the student or the organization taking this course into better doing their online

research work including to be fully capable of tracking down and monitoring the rogue and

malicious online activities of the bad guys online where the ultimate goal would be to better

position and enhance your cyber attack or malicious threat actor cyber campaign attribution

skills ultimately improving your work activities and actually empowering you to learn how to

do OSINT for good and most importantly to track down and monitor the bad guys.

Introduction

24062

In a world dominated by sophisticated cybercrime gangs and nation-state sponsored and toler-

ated rogue cyber actors the use of OSINT (Open Source Intelligence) is crucial for building the

big picture in the context of fighting cybercrime internationally including to actually "connect

the dots" in the context of providing personally identifiable information to a closed-group and

invite-only LE community including international Intelligence Agencies on their way to track

down and prosecute the cybercriminals behind these campaigns.

In this training and learning material Dancho Danchev one of the security industry's most

popular and high-value security blogger and cybercrime researcher will offer an in-depth peek

inside the world of OSINT in the context of fighting cybercrime and will provide practical advice

examples and case in particular on how he tracked down and shut down the infamous Koobface

botnet and continued to supply never-published and released before potentially sensitive and

classified information on new cyber threat actors which he continued to publish at his Dancho

Danchev's blog.

Basics of OSINT

OSINT in the context of fighting cybercrime can be best described as the systematic and persis-

tent use of public information for the purpose of building a cyber threat intelligence enriched

data sets and intelligence databases both for real-time situational awareness and historical

OSINT preservation purposes which also include to actually "connect the dots" in cybercrime

gang and rogue cyber actor campaigns and cyber attack type of campaigns. A general ex-

ample would consist of obtaining a single malicious software sample and using it on a public

sandbox to further map the infrastructure of the cybercriminal behind it potentially exposing

the big picture behind the campaign and connecting the dots behind their infrastructure which

would lead to a multi-tude and variety of personally identifiable information getting exposed

which could help build a proprietary cybercrime gang activity database and actually assist LE

in tracking down the prosecuting the cybercriminals behind these campaigns.

" *There's no such thing as new cyber threat actors. It's just new players adopting economic*

and marketing concepts to steal money and cause havoc online. "

The primary idea here is to locate free and public online repositories of malicious software and

to actually obtain a sample which will be later on used in a public sandbox for the purpose of

mapping the Internet-connected infrastructure of the cybercrime gang in question including to

actually elabore more on the ways they attempt to monetize the access to the compromised

host including possibly ways in which they make money including to actually find out what

exactly are they trying to compromise. Possible examples here include VirusTotal or actually

running a malware interception honeypot such as for instance a spam trap which would allow

you to intercept currently circulating in the wild malare campaigns that propagate using email

and actually analyze them in terms of connecting the dots exposing their Internet-connected in-

frastructure and establishing the foundations for a successful career into the world of malicious

software analysis and cybercrime research.

" *Everything that can be seen is already there*".

The next logical step would be to properly assess and analyze the recently obtained sample and

to properly establish the foundation of a "connect the dots" culture within your organization

where the primary goal would be to have researchers and analysts look for clues on their way

to track down and monitor a specific campaign potentially coming up with new and novel cyber

attack attribution research. Visualization is often the key to everything in terms of visualizing

threats and looking for additional clues and possible cyber attack attribution clues where a

popular visualization and threat analysis tool known as Maltego should come into play which

basically offers an advanced and sophisticated way to process OSINT and cybercrime research

24063

and threat intelligence type of information and actually enrich it using public and proprietary

sources of information for the purpose of establishing the big picture and actually connecting

the dots for a specific cyber attack campaign.

Among the first things that you should consider before beginning your career in the World

of OSINT is that everything that you need to know about a specific online event a specific

online campaign that also includes the activities of the bad guys online is already out there

in the form of publicly accessible information which should be only processed and enriched

to the point where the big picture for a specific event or a malicious online campaign should

be established using both qualitative and quantitative methodologies that also includes the

process of obtaining access to the actual technical details and information behind a specific

online event or an actual malicious and rogue online campaign.

Among the few key things to keep in mind when doing OSINT including actual OSINT for cyber

attack and cyber campaign attack attribution is the fact that in 99 % of the cases all the col-

lection information that you need in terms of a specific case is already publicly known and is

publicly accessible instead of having to obtain access to a private or a proprietary source of

information and the only thing that you would have to do to obtain access to it is to use the

World's most popular search engine in terms of collection processing and enrichment.

The second most popular thing to keep in mind when doing OSINT is

that you don't need to

obtain access to proprietary even public OSINT tools.

Current State of the Cybercrime Ecosystem

In 2021 a huge number of the threats facing the security industry including vendors and orga-

nizations online include RATs (Remote Access Tools) malicious software part of a larger bother

malicious and fraudulent spam and phishing emails including client-side exploits and vulner-

abilities which have the potential to exploit an organization or a vendor's end points for the

purpose of dropping malware on the affected host including the rise of the ransomware threat

which is basically an old fashioned academic concept known as cryptoviral extortion.

With more novice cybercriminals joining the underground ecosystem market segment largely

driven by a set of newly emerged affiliate based revenue sharing fraudulent and malicious

networks offering financial incentive for participation in a fraudulent scheme it shouldn't be

surprising that more people are actually joining the cybercrime ecosystem potentially causing

widespread damage and havoc online.

With cybercrime friendly forums continuing to proliferate it should be clearly evident that more

people will eventually join these marketplaces potentially looking for new market segment

propositions to take advantage of for the purpose of joining the cybercrime ecosystem and that

more vendors will eventually continue to occupy and launch new underground forum market

propositions for the purpose of promoting and looking for new clients for the services.

In a World dominated by a geopolitically relevant Internet cybercrime ecosystem it shouldn't

be surprising that more international cybercrime gangs will eventually continue to launch new

fraudulent and malicious spam and phishing campaigns that also includes malicious software

campaigns for the purpose of earning fraudulent revenue.

With more affiliate based underground market segment based networks aiming to attract new

uses where they would forward the risk for the actual infection process and fraudulent transac-

tion to the actual user in exchange for offering access to sophisticated bulletproof infrastructure

including advanced and sophisticated malware and ransomware releases it shouldn't be sur-

prising that more people are actually joining these affiliate networks for the purpose of earning

fraudulent revenue in the process of causing havoc and widespread disruption online.

In this brief Basics of OSINT in the context of fighting cybercrime article we provided a general

overview of the process of using OSINT for cybercrime fighting purposes and we hope that you

enjoyed the article and will be eager to go through the second part of the article series which

will be published at our Web site in the coming weeks.

Stay tuned!

18.7.16 Introducing WhoisXML API's WHOIS Conclave Law Enforcement IoCs and Re-

search on Demand Threat Intelligence Feed! (2022-07-29 16:16)

Dear blog readers,

I wanted to take the time and effort and present my latest project with WhoisXML API my

employer where I'm currently acting as a DNS Threat Researcher which is a Law Enforcement

IoCs and threat intelligence feed including research and reports service on demand service

which you can apply for [1]here.

Feel free to approach me at research@whoisxmlapi.com in case you're interested in applying

for access or just have a general question about the service including sales@whoisxmlapi.com

in case you're interested in applying for access or want to inquire about obtaining access to

the service.

18.7.17 Shots from the Wild West - Sample Compilation of RATs (Remote Access

Tools) and Trojan Horses Screenshots - An OSINT Analysis - Part Two

(2022-07-30 02:18)

Dear blog readers,

I've decided to share with everyone a personal compilation portfolio of currently and historically

active RATs (Remote Access Tools) and trojan horses for the purpose of improving everyone's

situational awareness including to improve your technical collection skills and capabilities.

Sample screenshots:

E:\WINDOWS\system32\cmd.exe
ProKill v2.2 - Mark Vogels (c) 2006
White Scorpion Security - http://www.white-scorpion.nl

Usage: pk <options>

pk -l                   ¦ list current processes
pk -lf                  ¦ list all processes with full path
pk -p <pid>             ¦ Kill process with pid
pk -n <name>            ¦ Kill all processes with that name

Examples:
pk -p 512               ¦ kills process with pid 512
pk -n WINLOGON.EXE      ¦ kills process WINLOGON.EXE (case sensitive)
pk -n WIN*              ¦ kills all processes starting with WIN
pk -n *                 ¦ kills ALL processes, use with extreme caution!

D:\Mozill\prokill_v2.2\bin>pk -lf

Can not modify registry.

In windows registry editor.

I update list and tryed refresh but nothing happend.

When i test around in registry with spy-net client and taking screen shots with paint i got this explorer error. Server closed but was back after restart windows. I did not get this error again.

About Odysseus [Trojan Horse]
'The Trojan Horse' is based on a smart idea of the clever Greek Odysseus. In the tenth year of the Trojan War, the Greeks tricked the enemy into bringing a colossal wooden horse within the walls of Troy. The Trojans had no idea that Greek soldiers were hidden inside, under the command of Odysseus. That night they emerged and opened the city gates to the Greek army. Troy was destroyed. Now it was time for Odysseus and the other Greeks to return to their kingdoms across the sea.

When i shutoff/restart pc this window pop up.
If i click on End Now, the pc will turnoff/restart normal, but then the spynet server will not start again.

Same thing happends when inject to explorer.exe

If i wait for pic 1 to finish. Then this new End Now or Cancel appair. If i click End Now The pc turnoff/restart normal. And now the spynet server start normal too.

The same ting happends when inject to explorer.exe

18.8.1 In Retrospective - A New Anthena DDoS Bot Spotted in the Wild - An OSINT

Analysis (2022-08-02 07:54)

I've decided to resume posting posts part of my upcoming blog post series called "In Retro-

spective" where my aim is to share interesting findings from across the cybercrime ecosystem

in the context of new malicious software releases and various other cybercrime ecosystem

underground market propositions with the idea to offer a unique peek inside today's modern

cybercrime ecosystem.

Case in point is the Anthena DDoS bot which as a variety of unique features and should be

considered a quite recent release in the context of having users buy it and actually use it to

build botnets and launch new DDoS attacks against their victims.

Sample screenshot of the malicious software in action:

[8]

It should be fairly easy to conclude that every time the bad guys launch a new DDoS bot on

the market the actual lifecycle of the malicious software release is prone to grow and extend to

the point where it's lifecycle is proportion with the general availability of new features includ-

ing various ways in which antivirus solutions might fail to detect the new malicious software

release including possibly a well documented source code which could be offered for sale po-

tentially improving the lifecycle of the malicious software including the actual introduction of

new features courtesy of third-parties which also include the general public including malicious

24416

software authors who might be interested in possibly introducing new features largely thanks

to a publicly accessible source code.

18.8.2 Sample Screenshots of TDoS (Telephony Denial of Service) Tools - An OSINT

Analysis (2022-08-02 07:54)

Did you know that for a modest financial investment you could basically outsource the taking

down of someone including your competitor's mobile phones including an organization's entire

phone system by basically hiring a Russian based TDoS (Telephony Denial of Service) provider

which basically utilizes various publicly accessible DoS (Denial of Service) attack techniques

that also includes the automated breaking of CAPTCHA for the purpose of registering hundreds

of rogue and bogus accounts where the ultimate goal would be to use them in bulk for the

purpose of launching a TDoS (Telephony Denial of Service) attack against a victim including

the competition which could also mean an organization's entire phone system based on the

actual requirements of the individual ousourcing the attack to the Russian based provider of

TDoS (Telephony Denial of Service) attack services.

I've recently decided to dig a little bit deeper inside this booming

market segment within the

cybercrime ecosystem and basically found a multitude of various propositions courtesy of dif-

ferent providers where the potential user of these services could also get a price bargain on

their way to obtain and launch a TDoS (Telephony Denial of Service) against a victim including

a competitor which could also mean an organization's entire phone system.

I'll continue taking a deeper look inside the currently emerging and actually booming cyber-

crime ecosystem market segment for TDoS (Telephony Denial of Service) attacks and I'll post

updates as soon as new developments take place.

18.8.3 In Retrospective - A New Armageddon DDoS Bot - An OSINT Analysis

(2022-08-02 09:27)

[1]

I've decided to share with everyone a recently released Armaggeddon DDoS bot which aims

to differentiate itself from by offering not just standard DDoS bot features and functionalities

but also the fact that it's under currently active development by the malware authors behind

it with the idea to position it as a market leading DDoS bot where the ultimate goal would be

to acquire new clients.

The bot offers a variety of DDoS attack features and despite the rather modest GUI it has the

capacity to cause widespread damage based on the number of affected users internationally.

I'll continue monitoring the actual development of the bot and post updates as soon as new

developments take place.

18.8.4 In Retrospective - A New E-Shop for Compromised PCs Spotted in the Wild -

An OSINT Analysis (2022-08-02 09:33)

[1]

24428

I've recently spotted a newly launched E-shop for compromised PCs where the ultimate goal

would be to use the actual access to the compromised PCs for setting up the foundations for

a successful botnet propagation campaign including to actually use them for data mining pur-

poses where the ultimate goal would be to look for accounting data for major Web properties.

The E-Shop offers access to a variety of compromised PCs based in different geographical

locations where the ultimate goal would be to make it easier for the client to properly segment

the compromised PCs population in the context of only acquiring compromised PC hosts based

on their actual geographical needs.

I'll continue monitoring the development of the E-Shop and will post updates as soon as new

developments take place.

18.8.5 In Retrospective - A New Dedal DDoS Bot Spotted in the Wild - An OSINT

Analysis (2022-08-02 09:47)

[1]

24429

I've recently stumbled upon yet another recently released DDoS bot which is basically offering

standard features typical for such malicious software releases and is

aiming to differentiate

its cybercrime ecosystem proposition by offering different pricing mechanisms to its potential

clients.

[2]

24430

I'll continue monitoring the development of this DDoS bot and will post updates as soon as

new developments take place.

18.8.6 In Retrospective - A New DIY Herpes Botnet Builder Spotted in the Wild - An

OSINT Analysis (2022-08-02 10:22)

I've recently came across to a new malicious DIY botner builder release and I've decided to

sharing my findings including some screenshots with the idea to share as much information

as possible regarding this new malicious software release including to improve everyone's

situational awareness.

Sample screenshots:

[1]

24431

[2]

[3]

24432

[4]

Among the key features of the new DIY botnet building tool is the geographical distribution of

the affected hosts on a global map where the ultimate goal for the malware coders behind the

release of this malicious software would be to make it easier for their clients to keep track of

newly infected hosts.

Related MD5s known to have been involved in the campaign include:

MD5: cdb54a3654ff2fdda7e90c48cbacda02

I'll continue monitoring the development of this DIY botnet builder and will post updates as

soon as new developments take place.

18.8.7 In Retrospective - A New Malware Bot Vector Spotted in the Wild - An OSINT

Analysis (2022-08-06 20:55)

I've recently came across to a new malicious software release that has some pretty

interesting and what can be best described as advanced form grabbing features and I've

decided to further elaborate on some of its key features which basically include advanced

form grabbing features for a variety of applications and web services which makes the

malicious software release a pretty important release in the context of introducing new and

novel features within the cybercrime ecosystem.

18.8.8 Exposing

GCHQ's

URL

Shortening

Service

-

An

OSINT

Analysis

(2022-08-06 20:56)

I've recently decided to come up with a proper analysis on a well known GCHQ URL shortening

service used for monitoring purposes where the ultimate goal would be to provide additional in-

sights into its Internet-connected infrastructure and try to find additional links and connections

between related campaigns courtesy of the GCHQ

Sample URL known to have been involved in the campaign:

hxxp://lurl.me

Related domains known to have been involved in the campaign include:

hxxp://mhhiuag.com

hxxp://lhgeesp.biz

hxxp://ciwcesp.com

hxxp://lhgeesp.net

hxxp://ciwcesp.biz

Sample related responding IPs known to have been involved in the campaign include:

hxxp://198.105.254.11

hxxp://37.220.34.116

hxxp://109.235.48.3

hxxp://64.74.223.47

hxxp://198.105.244.11

Sample screenshots include:

18.8.11 A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums -

Part Six - An OSINT Analysis (2022-08-09 13:42)

[1]

24532

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://abubakr1400.blogspot.com/

hxxp://ageofjahiliyah.wordpress.com/

hxxp://alkarnee.wordpress.com

hxxp://arabicgems.wordpress.com

hxxp://istiqaamah.wordpress.com

hxxp://www.crusaderwatcher.blogspot.com/

hxxp://dajjalwatch.wordpress.com

hxxp://danielaljughaifi.wordpress.com

hxxp://siyasah.wordpress.com

hxxp://islamicconquestofsyria.blogspot.com

hxxp://gulfcoastafrican.blogspot.com

hxxp://feesabeelillah.blogspot.com

18.8.12 A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums -

Part Seven - An OSINT Analysis (2022-08-09 13:42)

[1]

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://alnosra.raslny.com/

hxxp://www.alnusra.net/vb/

hxxp://www.mogahid.com/files/zewar.html

18.8.13 A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums -

Part Nine - An OSINT Analysis (2022-08-09 13:43)

[1]

24555

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://w-n-n.com/external.php?forumids=10

hxxp://w-n-n.com

hxxp://w-n-n.com/showthread.php?t=31959 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31753 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31669 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31611 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31606 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31557 & #038;goto=newpost

hxxp://w-n-n.com/showthread.php?t=31423 & #038;goto=newpost

18.8.14 A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums -

Part Fourteen - An OSINT Analysis (2022-08-09 13:43)

[1]

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://news.bbc.co.uk/1/hi/uk _politics/6739681.stm

18.8.15 A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums -

Part Fifteen - An OSINT Analysis (2022-08-09 13:43)

[1]

24687

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

18.8.18 In Retrospective - A Peek Inside the Pony Loader Cybercrime-Friendly Mali-

cious Software Release - An OSINT Analysis (2022-08-18 19:58)

[1]

I recently took a peek inside some of my old threat intelligence gathering research archives and

I've decided to share with everyone some sample screenshots including an actual description

from the extremely popular and high-profile back then Pony Loader malicious software release.

Enjoy!

Sample screenshots of the Pony Loader in action:

[15]

24904

Sample description of the Pony Loader:

" *Collection system FTP passwords "Pony"*

Purpose and Objectives of the project

Collection of FTP passwords of 81 + popular FTP-client and Web-browser

with the infected

computers

Invisible to the user's application

The minimum size and time of the grabber on the infected computer

24905

General information

The project is divided into three parts:

Client "Pony.exe" - a program that needs to be progruzhat on computers, it collects and

sends passwords to the server.

Builder (PonyBuilder.exe) - a set of programs to create a build-client

"Pony.exe". Build collected automatically by the compiler masm32, which

is included in the kit.

A set of server-side PHP script - admin panel, as well as script-gate (gate.php) on which

to send passwords.

In order to collect passwords used an unusual approach

When you run the client "Pony.exe" automatically collected passwords and

data required to decrypt files in a special container called "reports"

(reports), and then encrypted to the server, where they are processed.

Each report can contain tens or even hundreds of passwords, as well as

other supporting information.

In fact, "Pony.exe" does not contain any decryption algorithms, but only a simple func-

tion to read data files and the registry.

All work on deciphering the password takes on a Web server, it is not

resource-intensive operation, because Most algorithms are trivial, the

server spends on average less than 10 ms (0.01 seconds) to process the

report with passwords.

Positive aspects of this approach:

The minimum size of the file progruzhat "Pony.exe"

The minimum time on the infected computer, on average, less than a second 1st

24906

If an FTP client just updated the encryption algorithm, but also stores

files with passwords as well as before, which is typical for the

majority of popular FTP-client, there is no need to re-create and build

progruzhat it, but only to make the appropriate modifications to the PHP

script

No chance of a mistake in the algorithm decryption password and lose

FTP, reports can be processed on the server again, after fixing a bug

Negative:

Requires a full-fledged Web server is configured to decrypt the password, with some

specific requirements

Increased traffic to the server, this adds the ability to pack records

Requirements for the Web server

Apache / nginx

PHP 5.2 +

MySQL

Required extensions for PHP

zlib - Library for compression / decompression of data using deflate

libxml - library for fast processing of XML files

mysql - the extension to work with the MySQL database

mhash - with a library of hash algorithms (included in the main assembly PHP 5.3 +)

mcrypt - with a library of encryption algorithms

gmp - a mathematical library for working with large numbers

iconv, mbstring - extension for converting multibyte (UTF-8, ...) lines

gd - a graphics library that is used for plotting

curl - the extension to work with the network

24907

pcre - a library of algorithms for working with regular expressions

json - JSON library for decoding strings

zip - Library for handling zip archives

Optional extension for PHP

sqlite3 - is required as the class (PHP 5.3 +), or as a driver PDO (PHP 5.2 +), or some

decrypted passwords will not be

A set of server-side scripting is not tied to the root folder and can be

moved anywhere you want. In the working folder, you must create the

directory "temp" and give it a read, write and execute (chmod 777). Name

the folder "temp" can be overridden in the configuration file

"config.php".

Example of assembly PHP:

Configure Command '. / Configure' '- enable-mbstring = all' '-

with-zlib' '- with-iconv' '- with-gd' '- with-curl' '- with-pcre -regex

" - with-gmp " - with-mhash " - with-mcrypt " - with-mysql " -

with-libxml-dir " - prefix = / opt / php ' '- with-sqlite3' '-

with-freetype-dir' '- enable-gd-native-ttf' '- with-png-dir' '-

with-jpeg-dir' '- enable- zip '.

The server side (admin panel)

Scope of supply:

The file "config.php" - contains the basic settings required for the

performance of PHP scripts admin. Inside the file, you must register

your MySQL server settings, choose a password to decrypt the report,

specify the folder for temporary files.

The file "setup.php" - automatic installation script, you need to run

the initial configuration of the admin panel, then you can remove it.

This script creates the necessary tables MySQL, set the login and

password. Before running the "setup.php" should set the parameters of

MySQL server in the file "config.php". To repeat the automatic tuning of

the panel, you must first remove all the tables with the prefix "pony _"

24908

from the database MySQL.

The file "gate.php" - script-gate, which receives reports from the password "Pony.exe".

The file "admin.php" - the main manager of the script admin panel.

The folder "temp" - the folder for temporary files and templates,

Smarty, you must install the right to read, write and execute (chmod

777).

The folder "includes" - a set of supporting files.

Admin functions

Home - General information about the ongoing work of the server.

List of FTP - here you can download or clear the lists obtained by FTP / SFTP.

Others - you can download or clear the lists received certificates.

Statistics - current statistics on the data collected, it is necessary

to take into account that the cleaning list FTP / reset the statistics

report.

Domains - on this page, you can add a backup domain grabber for the operational test

for accessibility.

Logs - here you can see a critical error and notification server.

Reports - Reports a list of current passwords.

Management - server settings, as well as account management.

Help - help file.

Exit - exit from the admin panel.

Differentiation of user admin

Members are divided into two types:

Administrator (admin) - can do everything: delete / add new users,

24909

change the server settings (password is encrypted reports), change the

privileges / passwords of other users, clear the lists of passwords. The

administrator can only be one.

User (user) - depending on the privileges can either just view the data

(user _view _only), or view lists and clean FTP / SFTP / reports / logs

(user _all). User can change your password. The user will not see the

additional functionality that is available only administrator.

Additional information

Each received a report contains additional information:

OS - version of Windows.

IP - IP address of the sender.

HWID - a unique user ID does not change with time.

In this ID can be found all the re-

ports from a particular computer.

Privileges - with what rights (User / Admin) process was started "Pony.exe".

Architecture - x86/x64 architecture of a microprocessor, which was launched by the pro-

cess of "Pony.exe".

Version - version of the client "Pony.exe".

Clear the list of reports and FTP / SFTP resets statistics (graphs and text data).

Identical reports with the passwords in the database are not imported when you receive

a duplicate, the logs will be notified.

Import records with passwords through "gate.php" takes place in two stages:

The resulting report is imported into the database MySQL. Only when the

import was successful in the database will return the gate positive

response to the client "Pony.exe" to avoid sending passwords in the

following (redundant) domains.

The report is processed (parsed), then found FTP added to the database, and report the

status of prescribed "processed."

If the report has received the status "not processed" means either the

server is overloaded (exceeded the maximum time the script), or parsing

the script left with a critical error. In any case, the report will not

be lost.

24910

If the system used by several users, you must go under different accounts, otherwise it

will always pop up login window.

After clearing the lists, the data in a MySQL database does not always

physically removed (especially logs), so you should periodically run the

optimization (compression) tables.

Optimization (compression), MySQL table is best carried out when there

is heavy load on the database, ie client "Pony.exe" does not send

passwords active.

Builder "PonyBuilder.exe"

Task Builder - Configure and compile the client "Pony.exe", to be progruzhat to infected

computers.

Scope of supply:

Folder "masm32" - the compiler Microsoft Macro Assembler (MASM).

Folder "PonySrc" - the source code in MASM client program (grabber) "Pony.exe".

Folder "BuilderSrc" - the source code in Delphi 7 support program-Builder "PonyBuilder.exe".

The file "PonyBuilder.exe" - program-builder for the customer "Pony.exe".

The file "Help.txt" - help file.

The file "build.bat" - a script used by the builders build to compile from source "PonySrc".

The file "Pony.ico" - the icon is attached to the "Pony.exe" at compile time, if the builder select

the corresponding option.

The interface is divided into four tabs:

Builder

The text box "list of domains to send passwords" - here you can set a

list of URL gates to send passwords. Each line - a separate URL, for

24911

example: [16]http://somedomain.com/dir/gate.php

You can add an unlimited number of rows (URL), the same URL can be

added multiple times. The domain may contain information about the port

connection, for example: [17]http://privatedomain.com:8080/gate.php. Https:// protocol is

not currently supported.

"Pony.exe" will try to connect and send a report with the passwords on

the list, if the data is successfully delivered, the program will exit

immediately without attempting to connect to the rest of the URL.

*The "Select icon" allows you to set the icon for the compiled file is only supported format *. Ico.*

The "New Build" compile file "Pony.exe" to your settings.

Loader

A simple loader (boot files). After gathering passwords from these links

(URL) will be loaded and run files. URL given in the same manner as the list of domains to send passwords. In the lower part of the tab you can specify the following options:

Activate the loader - the loader include work, otherwise the files will not load.

Do not run the same files twice - after the successful launch of the downloaded file into the registry will be added to the reference value (hash) of the data file, and then, when re-loading, a duplicate will not run.

Settings

To see all the settings, you need to activate the option "Show advanced settings" in the main menu.

Compress - compress reports using the library aPLib, adds about 5kb to the size of the executable file, packs a good text data before sending it, it is strongly recommended that you use greatly reduces the traffic to the server.

Encrypt - encryption algorithm reports RC4.

Encryption password - a password that is encrypted records, similar to the password must be installed in the server configuration.

Save reports to disk (for debugging) - when you start "Pony.exe", after the passwords have been collected in the same directory where the executable is running, it will create a file "out.bin", a container with a password in this form in which he was sent to the server for further processing (decoding).

Sending blank reports (for statistics) - usually, if no password is

found, the client "Pony.exe" personal server will not send, but it is

sometimes useful to include this option to get statistics on the number

of successful launches "Pony.exe".

Debug mode - removes an interceptor exceptions, be used only for debugging purposes.

Send only new records - if this option is not activated, then the duplicate records with

passwords are not sent.

Samoudalenie - running the file "Pony.exe" will be removed after the exit.

Add an icon - an icon to attach the selected file to be compiled.

Packing build with UPX - compress executable "Pony.exe" after compilation.

Number of attempts to send the report - how many times to try to send a

report when an unsuccessful transmission, it is recommended to specify a

minimum of two attempts.

Build Alternative:

Exe-file - normal executable Windows (. Exe)*

Dll-file - version of the assembly in the form. Dll libraries, it is

completely autonomous, to practice you must call from your project

API-only function LoadLibrary (), ie URL to send the password and all

settings are sewed in myself. Dll file. In the folder DllTest is a

simple example of testing, in the same folder to put the file Pony.dll,

then run the file DllTest.exe, which in turn calls LoadLibrary () for.

Dll library.

In the "Available Modules decoding" can be excluded from the build

unneeded passwords decoder, it will reduce the size of the build.

Skin

On this tab, you can choose a favorite skin (skin) Builder.

Starting the Builder from the command line

The following command line arguments Builder:

-PACK _REPORT - compress reports

24913

-ENCRYPT _REPORT - encrypt the records, if encryption password is not specified, the de-

fault will be listed "Mesoamerica"

-REPORT _PASSWORD = - password encryption, for example:-REPORT _PASSWORD =

Mesoamerica

-SAVE _REPORT - save reports to disk (for debugging)

-ENABLE _DEBUG _MODE - debug mode

-SEND _MODIFIED _ONLY - send only the new records

-SELF _DELETE - enable samoudalenie

-SEND _EMPTY _REPORTS - send a blank report

-ADD _ICON - attach a file icon from Pony.ico

-UPX - Build pack using UPX

-DOMAIN _LIST = - list of domains, each domain must be divided by spec.

*the symbol *

n, for example:-DOMAIN _LIST = [18]http://host.com/gate.php \ nhttp :/ / host2.com/x/gate.php

-LOADER _LIST = - a list of URL for the loader (it will be automatically

activated in the presence of URL), each URL must be divided similarly

DOMAIN _LIST

-LOADER _EXECUTE _NEW _FILES _ONLY - do not run the same files twice

-DISABLE _MODULE = - excluding specific module build decoding (all the

names of the modules can be seen in the file PonySrc \ FTPClients.asm),

for example:-DISABLE _MODULE = MODULE _OPERA

-DLL _MODE - use the assembly in the form of Dll-library

-COLLECT _HTTP - in addition to collect and HTTP / HTTPS passwords

-UPLOAD _RETRIES = N - the number (N) attempts to send a report if no value is speci-

fied, the default is 2 attempts

Client "Pony.exe"

The task of "Pony.exe" - to collect passwords from the computer and send them to the

server for processing.

24914

Works on all versions of Windows, from Win98, including server. It works

in the mode of x86 and x64. The program normally work out when you run

as an administrator or user.

Before the proliferation of file it is desirable to clean and kriptanut.

Implemented the instant decryption of stored passwords for the following programs:

18.8.19 In Retrospective - A Peek Inside A Popular Cybercrime Friendly Doorway

Generator - An OSINT Analysis (2022-08-18 20:12)

[1]

As I'm continuing to go through my old archive of actionable threat intelligence information

I've decided some screenshots of what appears to be a pretty advanced and sophisticated

cybercrime-friendly malicious doorway generator which is fully capable of launching content

24919

cloaking campaigns against major search engines on its way to properly hide the true nature

of a specific spam phishing or a portfolio or a portfolio of domains containing client-side

exploits and malicious software.

Rogue and malicious content farms made publicly available thanks to a variety of publicly or

proprietary accessible malicious and rogue content generators including malicious doorway

generators will continue to proliferate and populate the modern cybercrime ecosystem.

I'll continue monitoring this market segment and will post updates as soon as new develop-

ments take place.

Sample screenshots of the cybercrime-friendly doorway generator include:

Astalavista Security Group - Managing Director
Frame4 Security Systems - Contributor
TechGenix - WindowSecurity - Contributor
ZDNet Zero Day - Security Blogger
Webroot Threat Blog - Security Blogger

Conference and Events - Media and Press Coverage

Dancho Danchev is the world's leading expert in the field of cybercrime fighting and threat intelligence gathering having actively pioneered his own methodlogy for processing threat intelligence leading to a successful set of hundreas of high-quality anaysis and research articles published at the industry's leading threat intelligence blog - ZDNet's Zero Day, Dancho Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat Blog with his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister, NYTimes, CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the industry's leading threat intelligence blog - Dancho Danchev's - Mind Streams of Information Security Knowledge.

With his research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol the researcher continues to actively produce threat intelligence at the industry's leading threat intelligence blog - Dancho Danchev's - MinStreams of Information Security Knowledge publishing a diverse set of hundreds of high-quality research analysis detailing the malicious and fraudulent activities at nation-state and malicious actors across the globe.

18.8.21 A Compilation of Dancho Danchev's Personal Photos - An OSINT Analysis

(2022-08-27 22:10)

[1]

Dear blog readers,

I’ve decided to share with everyone a set of personal photos courtesy of me.

Remember that the "best is yet to come" and stay tuned for some of my latest research on this

blog.

Meanwhile consider subscribing to my RSS feed here.

Enjoy!

Sample personal photos courtesy of Dancho Danchev:

18.8.22 Exposing a Compilation of Known Ransomware Group's Dark Web Onion Web

Sites - An OSINT Analysis (2022-08-27 22:16)

[1]

Dear blog readers,

I've decided to share with everyone some of the findings from some of my latest Dark Web re-

search with the idea to improve your situational awareness in the world of growing and emerg-

ing cyber threats including ransomware releases on the infamous Dark Web.

In this post I'll provide a currently active list of Dark Web Onion web sites that exclusively

belong to various ransomware groups with the idea to assist everyone on their way to improve

their situational awareness in the world of fighting and responding including to monitor and

track down various ransomware campaigns globally.

Sample list of currently active ransomware themed Dark Web Onions include:

18.9.1 Exposing a Compilation of Known Ransomware Group's Dark Web Onion Web

Sites - An OSINT Analysis - Part Two (2022-09-20 13:09)

[1]

Hi everyone,

This is Dancho and I'm proud to let you know that this is the second post part of the "[2]Ex-

posing a Compilation of Known Ransomware Group's Dark Web Onion Web Sites - An OSINT

Analysis" blog post series where I did my best to share actionable intelligence on the Dark Web

whereabouts of some of the most prominent [3]ransomware groups.

Sample currently active portfolio of Dark Web Onion Web sites belonging to prominent ran-

somware groups include:

http://2cuqgeerjdba2rhdiviezodpu3lc4qz2sjf4qin6f7std2evleqlzjid.onion

http://37rckgo66iydpvgpwve7b2el5q2zhjw4tv4lmyewufnpx4lhkekxkoqd.on

18.9.3 Upcoming Launch of Dancho Danchev's Dark Web Content Media Empire!

Visit Us Today! (2022-09-23 07:21)

[1]

24968

Dear blog readers,

After approximately 17 years of operation of this [2]blog I've decided that the time has finally

come to launch a new big blogging and security and cybercrime research project this time on

the Dark Web.

Therefore I would like to welcome you do visit my [3]Dark Web Content Media Empire network

of blogs.

Main URL: [4]http://vu6e24gayw5xbzqocxtjbilgskquh7d2jliczddkakvfk7saxv6 omrid.onion

The ultimate goal here would be to present my knowledge in a variety of categories where

I intend to populate all of my Dark Web Onion blog categories on a daily basis potentially

reaching out to a new set of readers including both new and old readers who are used to my

blogging style and are familiar with my work and research.

Sample screenshot of Dancho Danchev's Dark Web Content Media Empire Dark Web Onion:

[5]

24969

I don't mean to be weird or something but what's "Pink Paradise"? "Pink Paradise" aims to

bring high-quality and never published before interviews and content materials from the adult

entertainment industry which I aim to produce on my own. There will be also approximately

12 new category and blog additions that I intend to begin working on as of today.

The rest is just the beginning of a known story to what I refer to as my blogging rhythm.

Stay tuned!

18.10 October

18.10.1 Attending Sofia Cyber Sec and Cyber Security Talks in Bulgaria! - Come and

Join Me! (2022-10-04 10:01)

[1]

24970

Dear friends and colleagues,

I'll be in Bulgaria this week and the week after attending two very interesting and important

cyber security events including a third event in November where I'll hold a presentation on the

topic of DDoS (Distributed Denial of Service) attacks.

The first even which I'll attend tomorrow is [2]Sofia Cyber Sec and the second which I'll attend-

ing next week will be [3]Cyber Security Talks in Bulgaria where I recently had the privilege to

meet and have a conversation with the event organizer which is quite an important initiative in

my homeland where I'm proud to attend the event and meeting with local experts and analysts

in the field.

If you're based in Bulgaria or attending you can drop me a line at dancho.danchev@hush.com

in case you're interested in catching up and meeting face to face.

Stay tuned!

18.10.2 Dancho Danchev's 2010 Disappearance - Official Complaint Against Harass-

ment Courtesy of Republic of Bulgaria - An OSINT Analysis (2022-10-12 15:03)

[1]

24971

Knock knock! Who’s there? Can you read my lips? But slowly? It’s Republic of Bulgaria within

the very bottom of Eastern Europe which they are not part of harassing me my research the

security industry and my family where the primary idea of this post is to complain officially and

make it easier for this factual post based on real home molestation and local police kidnapping

attempt courtesy of the city of Troyan which is my hometown and local gang robbing me and

stealing from me under the influence of local robbers and corrupt kidnappers known as Bulgaria

Law Enforcement.

Put [2]him [3]here. Awesome! [4]Thanks!

Stay tuned!

18.10.5 Exposing a Compilation of Known Locky Ransomware Themed BitCoin Ad-

dresses - An OSINT Analysis (2022-10-22 23:04)

[1]

24975

```
___=*=|+_+
.~$+*_==*_~=+-+-~~$
+_..__|~$

!!! IMPORTANT INFORMATION !!!!

All of your files are encrypted with RSA-2048 and AES-128 ciphers.
More information about the RSA and AES can be found here:
    http://en.wikipedia.org/wiki/RSA_(cryptosystem)
    http://en.wikipedia.org/wiki/Advanced_Encryption_Standard

Decrypting of your files is only possible with the private key and decrypt program, which is on our secret server.
To receive your private key follow one of the links:
    1.
    2.
    3.

If all of this addresses are not available, follow these steps:
    1. Download and install Tor Browser:
    2. After a successful installation, run the browser and wait for initialization.
    3. Type in the address bar:
    4. Follow the instructions on the site.

!!! Your personal identification ID:  !!!
